REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

It is noted that Beecher teaches a container having the two walls 1 and 2 in the expanded position of the container, and bottom flaps 6. Inter alias, the claim requires an interference fit between the flap and at least one juncture. This is not taught in Beecher since flaps 6 are hingedly connected to the sidewalls 1. Thus, the interference fit in Beecher is between the bottom flap and along the wall 2, excluding the juncture.

Furthermore, it is noted of the Haas (616869) and Dreyspring (21748) teaches a bottom member having an interference fit between the juncture with the bottom flap defines the entirety of a bottom surface of the expanded container. However, to make the bottom of Beecher of this construction would no possible because the one would destroy the slot in Beecher.

Furthermore, it is also noted of the limitation of the cord removably received and retained within the slot in the closed position as set forth in the claim.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
